

American's lives are being hurt by the Media Corporation's blatant disregard for the law and for the public interests.

Sinclair Broadcasting is using public airwaves free of charge but wants to break the law by forcing their stations to air anti Kerry propaganda just days before the general election.

We are asking that the FCC do their job by seeing that Sinclair Broadcasting is not given the message that they are above the law.

It is the responsibility of the FCC to see that Sinclair does not break the law and that they serve the public interest and not use our airwaves to serve their bottom line.

Sincerely,
Margaret Cabral and Arthur Henriques
